Contents

1 Introduction 1
- 1.1 Why perform a QTL experiment? 2
- 1.2 Crosses and data 3
  - 1.2.1 Mouse hypertension data as an example 8
- 1.3 Central statistical problems 9
  - 1.3.1 Models for recombination 12
  - 1.3.2 Models connecting genotype and phenotype 14
- 1.4 About R and R/qtl 17
- 1.5 Other software 18
- 1.6 Work flow 19
- 1.7 Further reading 20

2 Importing and simulating data 21
- 2.1 Importing data 22
  - 2.1.1 Comma-delimited files 22
  - 2.1.2 MapMaker/QTL 30
  - 2.1.3 QTL Cartographer 31
  - 2.1.4 Map Manager QTX 32
- 2.2 Exporting data 32
- 2.3 Example data 33
- 2.4 Data summaries 34
- 2.5 Simulating data 36
  - 2.5.1 Additive models 37
  - 2.5.2 More complex models 40
- 2.6 Internal data structure 42
  - 2.6.1 Experimental cross 42
  - 2.6.2 Genetic map 45
- 2.7 Further reading 46

3 Data checking 47
3.1 Phenotypes 47
3.2 Segregation distortion 50
3.3 Compare individuals' genotypes 52
3.4 Check marker order 53
3.4.1 Pairwise recombination fractions 53
3.4.2 Rippling marker order 60
3.4.3 Estimate genetic map 64
3.5 Identifying genotyping errors 66
3.6 Counting crossovers 68
3.7 Missing genotype information 70
3.8 Summary 72
3.9 Further reading 73

4 Single-QTL analysis 75
4.1 Marker regression 75
4.2 Interval mapping 80
4.2.1 Standard interval mapping 80
4.2.2 Haley–Knott regression 86
4.2.3 Extended Haley–Knott regression 88
4.2.4 Multiple imputation 91
4.2.5 Comparison of methods 94
4.3 Significance thresholds 104
4.4 The X chromosome 108
4.4.1 Analysis 109
4.4.2 Significance thresholds 113
4.4.3 Example 114
4.5 Interval estimates of QTL location 118
4.6 QTL effects 122
4.7 Multiple phenotypes 127
4.8 Summary 131
4.9 Further reading 132

5 Non-normal phenotypes 135
5.1 Nonparametric interval mapping 136
5.2 Binary traits 139
5.3 Two-part model 141
5.4 Other extensions 146
5.5 Summary 150
5.6 Further reading 150

6 Experimental design and power . . . 153
6.1 Phenotypes and covariates . . . 153
6.2 Strains and strain surveys . . . 154
6.3 Theory . . . 155
6.3.1 Variance attributable to a locus . . . 155
6.3.2 Residual error variance . . . 157
6.3.3 Information content . . . 158
6.4 Examples with R/qtlDesign . . . 159
6.4.1 Functions . . . 159
6.4.2 Choosing a cross . . . 160
6.4.3 Genotyping strategies . . . 164
6.4.4 Phenotyping strategies . . . 166
6.4.5 Fine mapping . . . 167
6.5 Other experimental populations . . . 168
6.6 Estimating power and precision by simulation . . . 170
6.7 Summary . . . 176
6.8 Further reading . . . 177

7 Working with covariates . . . 179
7.1 Additive covariates . . . 179
7.2 QTL × covariate interactions . . . 190
7.3 Covariates with non-normal phenotypes . . . 198
7.4 Composite interval mapping . . . 205
7.5 Summary . . . 210
7.6 Further reading . . . 210

8 Two-dimensional, two-QTL scans . . . 213
8.1 The normal model . . . 214
8.2 Binary traits . . . 228
8.3 The X chromosome . . . 232
8.4 Covariates . . . 236
8.5 Summary . . . 239
8.6 Further reading . . . 239

9 Fit and exploration of multiple-QTL models . . . 241
9.1 Model selection . . . 242
9.1.1 Class of models . . . 244
9.1.2 Model fit . . . 246
9.1.3 Model search . . . 248
9.1.4 Model comparison . . . 250
9.1.5 Further discussion . . . 254

9.2 Bayesian QTL mapping . . . 255
9.3 Multiple QTL mapping in R/qtl . . . 258
9.3.1 `makeqtl` and `fitqtl` . . . 259
9.3.2 `refineqtl` . . . 263
9.3.3 `addint` . . . 266
9.3.4 `addqtl` . . . 267
9.3.5 `addpair` . . . 269
9.3.6 Manipulating `qtl` objects . . . 272
9.3.7 `stepwiseqtl` . . . 274
9.4 Summary . . . 281
9.5 Further reading . . . 281

10 Case study I . . . 283
10.1 Diagnostics . . . 284
10.2 Initial cross . . . 291
10.3 Combined data . . . 300
10.4 Discussion . . . 311

11 Case study II . . . 313
11.1 Diagnostics . . . 314
11.2 Initial QTL analyses . . . 323
11.3 QTL × covariate interactions . . . 339
11.4 Discussion . . . 353

A Installing R and R/qtl . . . 355
A.1 Installing R . . . 355
A.1.1 Windows . . . 355
A.1.2 Mac OS X . . . 356
A.1.3 Unix/Linux . . . 356
A.2 Installing R/qtl . . . 357
A.3 Optimizing the R environment . . . 358
A.4 Working directories . . . 358
A.5 Documentation . . . 359
A.6 Email lists . . . 360

B List of functions in R/qtl . . . 361

C QTL mapping data sets . . . 365

D Hidden Markov models for QTL mapping . . . 371
D.1 Specification of the model . . . 372
D.1.1 The backcross . . . 373
D.1.2 The intercross . . . 374
D.2 QTL genotype probabilities . . . 374
D.3 Simulation of QTL genotypes . . . 376
D.4 Joint QTL genotype probabilities . . . 377

D.5 The Viterbi algorithm . . . 378
D.6 Estimation of intermarker distances . . . 379
D.7 Detection of genotyping errors . . . 380
D.8 A practical issue . . . 381
D.9 Further reading . . . 381
